Stability:	Five years from the date of manufacture.

The raw materials for these products were collected from calves 12 months and younger in the USA in abattoirs registered with the USDA. The animals received ante and post mortem inspections under a veterinarian's supervision and were apparently free from infectious and contagious diseases. At no time during collection or during processing was the material commingled with any other material of animal origin.
This product is sold for use in IVD, research, further manufacturing, or technical purposes only, and is not intended for direct use in diagnostic or therapeutic applications.
